

GANNON

- Demonstrate motivation and curiosity through interests and extracurricular activities
- Applicants who read, write and speak English as a second language must demonstrate proficiency in English skills
- Clinical experiences are an integral part of the program expected to meet the health professions, all students are standards, background checks and drug screening performance

The radiologic science program is a high demand major at Gannon and there are only 18 seats available. Therefore, it is highly recommended that all students apply in September of their senior year in high school. Transfer students should apply early in the fall as well.

This is to certify that
Jordyn T. Gault
has been accepted as a
member of the Incoming Class of 2017.
In the name of the University and Board of Trustees
I congratulate you on your acceptance.

Job Outlook	
Radiologic and MRI Technologists	
Percent change in employment, projected 2014-24	
Health technologists and technicians	16%
Magnetic resonance imaging technologists	10%
Radiologic and MRI technologists	9%
Radiologic technologists	9%
Total, all occupations	7%

Note: All Occupations include all occupations in the U.S. Economy
Source: U.S. Bureau of Labor Statistics, Employment Projections program
Employment of radiologic technologists is projected to grow 9 percent from 2014 to 2024, faster than the average for all occupations. Employment of MRI technologists is projected to grow 10 percent from 2014 to 2024, faster than the average of all occupations.
As the population grows, there will be an increase in medical conditions, such as cancer and Alzheimer's disease, which will lead to an increase in the demand for radiologic and MRI technologists who will be needed to take the images. In addition, the number of people with chronic health conditions is expected to continue to increase because of lifestyle habits that increase disease risk.
However, employment growth of radiologic and MRI technologists may be impacted, as many medical facilities and hospitals are cutting back on hiring and training new technologists, as well as investing in new technologies, such as treatment.
